

EINet^{MC} Multi channels meter Energy & Powermeter

EINet-MC energy powermeter is a compact, multi functional, multi channel, three\single-phase powermeter, especially designed to meet the stringent needs of power and energy measurement in any electrical installation.

EINet-MC includes history data logging and supports standard communication protocols BACnet and Modbus with simple integration into Building Management Systems over RS485 or Ethernet TCP as well as built in Web Browser.

An indispensable tool for the Building Engineer, it aids efficient use of electricity by showing Power Factor, Active and Reactive energy and Current in each and every Line in all channels.
